NEW BOOKS ON ECOLOGY

Practical Ecology: for Planners, Developers, and Citizens

Synopsis: "Perlman (biology, Brandeis U.) and Milder (an environmental planner and consultant) introduce key ecological concepts for planners, landscape architects, developers, and others involved in planning and building human habitats. Practical Ecology: for Planners, Developers, and Citizens offers guidelines for protecting species and ecosystems while also creating healthy, sustainable human communities. An appendix provides information on the state of biodiversity in North America, and the volume's 18 color plates are supplemented with many illustrations in b&w. Annotation \( \copyright \)2004 Book News, Inc., Portland, OR " from bookjacket

Synopsis: "Balancing the rights of local people with the obligation to preserve viable ecosystems for future generations is the single most pressing challenge confronting global citizens in the twenty-first century. In this book, Borgerhoff Mulder and Coppolillo provide a lucid and admirably interdisciplinary synthesis of anthropological, biological, and economic perspectives essential to scientifically enlightened dialogue in this domain. Conservation: Linking Ecology, Economics, and Culture grew out of a pioneering course titled 'People and Conservation,' but this unique synthesis will be as helpful to policy makers and park managers as it will be to

Thermal preference and activity thresholds in populations of Argia vivida (Odonata: Coenagrionidae) from habitats with different thermal regimes

Full text available as:

PDF - Requires Adobe Acrobat Reader or other PDF viewer.

Abstract

The hypothesis was tested that isolated populations of Argia vivida Hagen living in habitats with different thermal regimes would show similar larval temperature preferenda, similar distributions in temperature gradient, similar larval upper temperature activity thresholds, and similar adult minimum temperature flight thresholds. The hypothesis was supported in all cases, except for distribution within the gradient, where there were significantly fewer observations below 22°C in a population from a habitat with a fluctuating diel and annula temperature regime than in a population from a more thermally stable habitat. Larval modal temperature preferendum was 28°C; escape temperature (EST) was 35.4-36.4°C, critical thermal maximum (CTM) was 39.1-41.0°C, and upper lethal temperature (ULT) was 44.4-46.0°C. While technical difficulties affected the estimates of flight thresholds, there was no difference between the field estimates from different sites. Minimum body temperature for flight appears to be about 25°C, apparently higher than for several other zygopters, while larval activity thresholds and 96 hr LD50 of 36.8°C are similar to those recorded for other odonates.

EPrint Type: Article

A Horrible Experience

An Animal Trainer at the Mid-Winter Fair Is Almost Devoured Alive by Three Furious Lions.

San Francisco, Feb. 14.—Carlo Thiemann, an attendant at Col. Daniel Boone's wild animalshow at the mid-winter fair, was attacked by three lions last night and so horribly mangled that he may die. The evening performance had been in progress in Boone's arena for about half an hour and the circular enclosure was filled with people. The wild animals are exhibited in a large cage in the centre of the arena and it was time for the lions to go on. Three huge beasts, Parnell, Romeo and Commodore, were led into the cage by Thiemann, preparatory to

Loomware - Crafting New Libraries

Discussions related to information and technology in academic libraries, universities and life in general.

(Graphic Version)

RSC Archives for Africa

Building a Strong Science Infrastructure I have always liked the Royal Society for Chemistry - a model science organization in an area of research that needs them (ahem...ACS, are you listening?). The recent announcement by RSC that they are providing free access to their journal archive to over 50 countries (most in Africa) is a positive one. It also highlights... (Full Story)

NSF Releases NMI-R9

Grid Computing Components Plug-in to Sakai I was interested in the recent release of new software components for building applications and portals in grid computing, or collaborative science environments. One particularly interesting aspect of this one is the support for the Sakai portlets spec, which means the collaborative hooks have extended into this excellent open source LMS. The value of... Info*Nation: Choose a Career in Libraries

New Initiative for Library Dudes Info*Nation is an interesting new effort to promote librarianship as a career and attract new people to the profession. Check out their site and if you are interested in helping out you can contact the Info*Nation crew at infonation.project@gmail.com.... (Full Story)
