Breakthrough brings 'Star Trek' teleport a step closer

By Steve Connor, Science Editor
Monday, 4 June 2007

Scientists have set a new record in sending information through thin air using the revolutionary technology of quantum teleportation - although Mr Spock may have to wait a little longer for a Scotty to beam him up with it.

A team of physicists has teleported data over a distance of 89 miles from the Canary Island of La Palma to the neighbouring island of Tenerife, which is 10 times further than the previous attempt at teleportation through free space.
'Jumper'-Style Teleportation Just Barely Possible

Friday, February 15, 2008
By Charles Q. Choi

The movie “Jumper,” opening Thursday, has a hero with the extraordinary power to teleport anywhere on Earth by imagining the place he wants to go.

As fantastic as teleportation seems, it can actually happen in the real world.

"The fact is that physicists have teleported things over miles," said Edward Farhi, the director of MIT's Center for Theoretical Physics. "It doesn't violate the laws of physics."

Click here to visit FOXNews.com's Natural Science Center.

There's a huge — or rather, very tiny — caveat, however.
Chinese Military has Conducted Successful Matter Teleportation Experiments

Topic started on 7-5-2005 @ 04:16 PM by koji_K

According to a research paper commissioned by the Air Force Research Laboratory, the DIA has translated peer-reviewed Chinese journal articles describing Military-overseen experiments into the teleportation of matter using mental power alone. Living organisms were teleported through sealed containers, as well as radio transmitters. The Chinese have (allegedly) sent radio signals into hyperspace, the fourth dimension, the beyond, or whatever you want to call it!

Marshall Breeding
Perceptions 2008
Black Box

- Traditional ILS no longer advantageous or cost-effective
- 3 vendors - same problem as 3 individuals of a species
- Too slow to change, complex, expensive, can’t/won’t interoperate, small community
- Encourages a traditional library model and culture (closed & hierarchical)
Open Box

- OS ILSs like Evergreen provide richer/better way forward
- No single vendor owns code, but numerous support options
- Plug & play, less expensive, innovative, huge community growing every day
- Encourages a newer model & culture (open & collaborative)

**Abstract**

The Urban Whale

EDITED BY SCOTT D. KRAUS AND ROSALIND M. ROLLER
SolrPAC, SoPAC, PatronPac?

Focus on mobile interface

Integrate/replace with OpenLibrary and Fedora

Duplicate library metadata and digital objects on users HD

Zotero integration
Action #2

✓ Run, don’t walk to the nearest OS ILS

✓ Ideally, the nearest OS consortial project

✓ Commit with money, staff & passion

✓ Change workflow - even when you don’t need to
Transmogrification #2

Traditional Journals & Big Deals
Black Box

- Vendors have institutions in a tight squeeze
- Vendors milking open access for MORE money
- Journals digital via big deals
- Vendors increase by 5%+
- Status quo budgets or cuts
- Only academics can break it
Open Box

- Cost of producing scholarly journals is going down
- Open Access having some impact, but not enough
- More journals returning to local production
- Open sharing of articles/data increases impact factor
Wiley Made an Extra

$700,000,000

• Synergies and related efforts - promote open
• Fedora/OJS integration
• Advanced/automated workflows for IslandScholar
• Developing new access approach for journals
Action #3

✓ No go for increases > 0%, lobby for decreases in license costs
✓ Lobby scholars and editors to move to OA journals
✓ Radicalize faculty/library staff
✓ Build IRs that encourage culture of open
✓ Build subject repositories
Transmogrification #3

Cyberinfrastructure and Research Support
Black Box

- Research groups often isolated
- Implement systems that are not open and restrict access to data
- Failure to work together expensive & counterproductive
- Trend towards open science / data needs more collaborative systems
- Big science = big money
Open Box

- Open collaborative frameworks
- Support full research life cycle
- Digital assets and metadata for any research object similar to library’s
- Funding helps build central infrastructure and flexible software
- Assets and framework sharable
Transmogrified

Toboggan

- Automated workflows
- Each VRE a subject repository
- Semantic data store down to individual research object
- Development of core set of content models for research
- Development of appliance using Islandora
Action #4

✓ Support local research collaboration

✓ Help build Canadian VRE framework

✓ Create interoperable research repositories

✓ Share code/metadata development
Transmogrification #4

Community Based Digitization
Black Box

* Google Books project another “big deal” with uncertain future impact
* Vendor vs Library digitization
* Adherence to open standards and open access less likely
* Lack of focus on local
* Info Commons threatened
Open Box

- Projects like OpenLibrary & Internet Archive more likely to remain truly open
- Local efforts at scanning hold more promise for patron relevance & better quality
- Allow open harvesting
- Page-level object model help build semantic web
DUE REPARATION WILL BE EXACTED

Sold Premier Asquith while discussing German treatment of British Prisoners and their manner of warfare.

(Congravens Report)

The time has come when the people will be asked to exact reparation. This reparation will not be limited to financial compensation, but will include the restoration of those who have been unjustly treated.

Mashup: Using Exhibit to display Community History data

Here’s a simple example of Exhibit using the Map and Tile Views for the materials in the Island Lives collection.

- [http://137.149.66.57:8888/exhibit/peihistory.html](http://137.149.66.57:8888/exhibit/peihistory.html)
  - points to our live community histories spreadsheet on google docs ... data is updated when spreadsheet is updated ... data could be pulled from fedora or any other source and reformatted in the proper json format.
  - additional geo data manually entered in the [http://137.149.66.57:8888/exhibit/peihistory.js](http://137.149.66.57:8888/exhibit/peihistory.js) file.

But we could utilize it for the timeline and geographic display of pei community history data.

About Exhibit

Exhibit is a [three tier web application framework](http://www.exhibit.org) written in javascript, which you can include like you would include Google Maps.

If you just want to show a few hundred records of data on maps, timelines, scatter plots, Interactive tables, etc., why bother learning SQL, ASP, PHP, CGI, or whatever when you can just use Exhibit?

To use Exhibit, you write: a simple data file, and an HTML file in which you specify how the data should be shown. Data + Presentation. That’s all there is to publishing, as it should be.

- Views
  - Tile View (Default View)
  - Thumbnail View
  - Map View, tutorial
  - Timeline View

Moby-Dick is an 1851 novel by Herman Melville. The story tells the adventures of the wandering sailor Ishmael and his voyage on the whaleship Pequod, commanded by Captain Ahab. Ishmael soon learns that Ahab seeks one specific whale, Moby-Dick, a white whale of tremendous size and ferocity. Comparatively few whaleships know of Moby-Dick, and fewer yet have encountered him. In a previous encounter, the whale destroyed Ahab's boat and bit off his leg. Ahab intends to take revenge. In Moby-Dick,.... full article at wikipedia

If you're a fan of *Harry Potter*, then you're quite familiar with the concept of an invisibility cloak. In his first year at Hogwarts Academy, Harry receives an invisibility cloak that used to belong to his father. As its name suggests, the invisibility cloak renders Harry invisible when he slips beneath the shining, silvery cloth.
